

# MAYO TABLE - MECHANIC

MODEL: 40460  
ORDER NO: 55.1011

## Description

The mechanical surgical table is used to provide surgical instruments required by surgeons and healthcare personnel in a sterile environment and within easy reach. It offers great convenience by preventing instruments from scattering and minimizing time loss during surgery. Thanks to its mechanical structure, the table's height can be adjusted to the desired level, providing an ergonomic working environment.

## General Features
