

PATIENT BED HEAD UNIT WITH THREE CHANNELS AND LAMPS

MODEL: 1000.50 - 1000.60
ORDER NO: 66.1001 - 66.1002

PRODUCT FEATURES

General Feature

Electrical Outlet	3 units
Lighting	1 direct 18W LED 6500K (Reading), 1 indirect 18W 6500K (Ambient)
Switch	1 pc
Dimensions (WxDxH)	275 x 100 x Length (Optional)
Total Weight	10 - 12 kgs
Input Voltage	220 V / 50 Hz

Description	Length	Model No
Electrical Plug	1500-1800 mm	1000.50
Lighting	3000-3600 mm	1000.60

Material Features

Material	Aluminum
----------	----------

Optional Products

Data Socket
UPS Socket
Nurse Call
Telephone Socket

Gas Outlets Used

Oxygen (O ₂)
Medical Air 4 (MA4)
Medical Air 7 (MA7)
Nitrous Oxide (N ₂ O)
Carbon Dioxide (CO ₂)
Vacuum (VAC)

Description

ÜZÜMCÜ Patient Bed Head Units provide integrated solutions for medical gas outlets, nurse call systems, and electrical outlets in patient care areas. All electrical installations are in compliance with IEE regulations. The units are manufactured from impact-resistant materials and are suitable for cleaning with hospital disinfectants. Each section can be customized according to customer requirements.

Classification

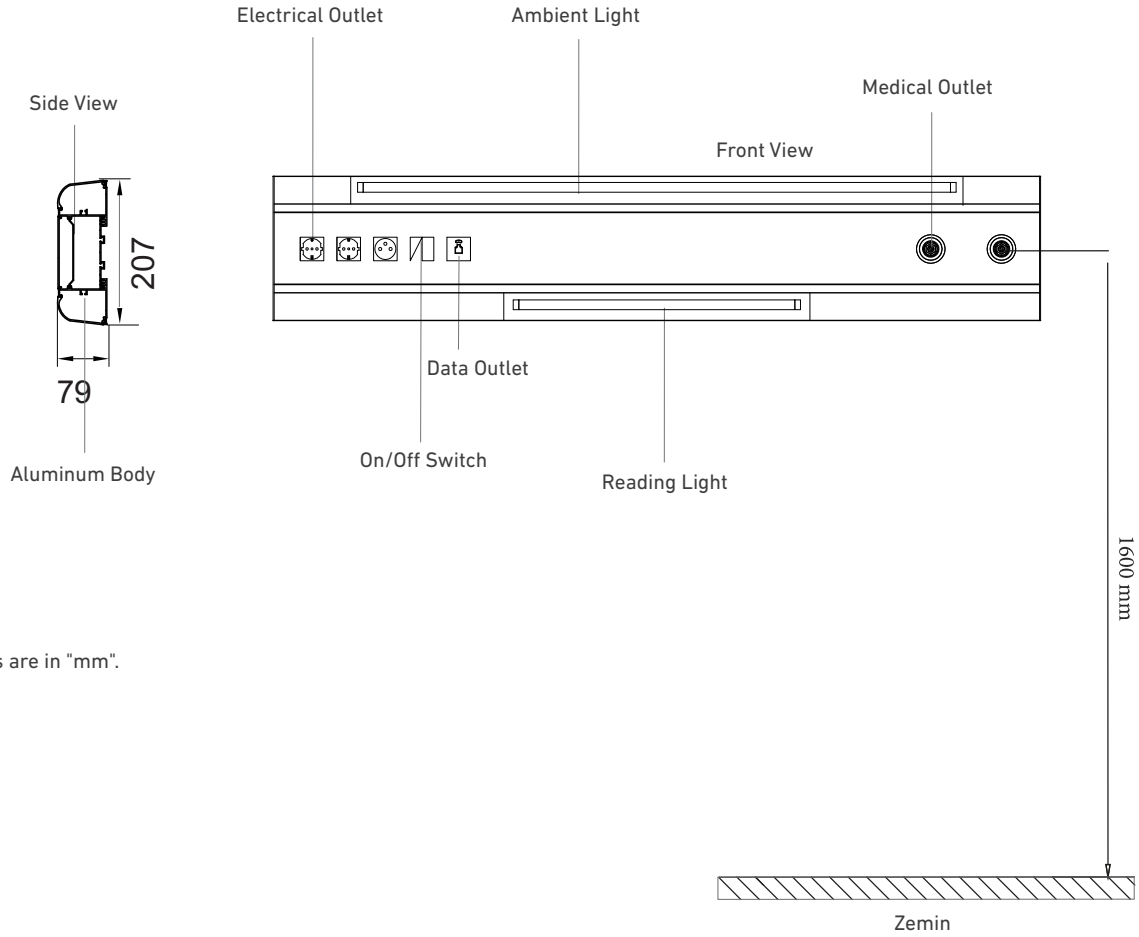

Our Bedhead Units are classified as Medical Device Class I in accordance with the MDD 93/42/EEC regulation and comply with international standards such as HTM 02-01, HTM 2022, EN 11197, EN 60601-1, and ISO 13485 in terms of safety, performance, and quality assurance. Compliant with international standards such as ISO 13485.

- The body is anodized, and the covers are electrostatically painted.
- The main body and covers are made of aluminum extrusion.
- The color of the body and covers can be selected according to user requirements.
- Medical gas and electrical outlets are designed in accordance with international standards.
- Length options are available for single and double beds.
- Manufactured using materials with high impact resistance.
- Surfaces suitable for easy cleaning and disinfection.
- Nurse call system can be integrated.
- Integrated lighting options (reading lamp, ambient lighting, etc.).
- Built-in lighting options (reading lamp, ambient lighting, etc.)
- Integrated medical gas piping and connection points
- Electrical outlets are equipped with grounding for safety.
- Ergonomic design ensures ease of use.
- Modular design allows customization according to specific needs.
- Fire-resistant materials are used to enhance safety.
