Alarm Unit

Regional Area Alarm

Pressure Switches

Pressure switches can be mounted inside the box to provide local monitoring.

Services

Oxygen (O₂)

Medical Air 4 (MA4)

Medical Air 7 (MA7)

Nitrous Oxide (N₂O)

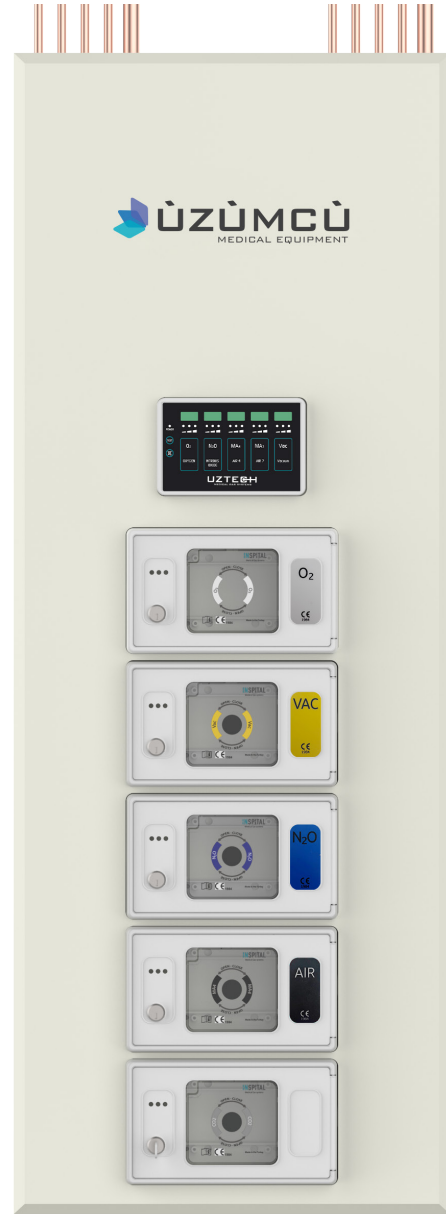

Vacuum (VAC)

Description

The ÜZÜMCÜ Regional Valve Service Unit is designed to provide isolation of medical gases on a floor-by-floor basis in hospitals. The AVSU module unit meets all the requirements of EN ISO 7396-1 and HTM 02-01 standards. Isolation can be used for installation, maintenance, or emergency scenarios. The Anesthetic Gas Collection Central is delivered skid-mounted and fully assembled. System tests are conducted in the factory environment prior to shipment.

Classification

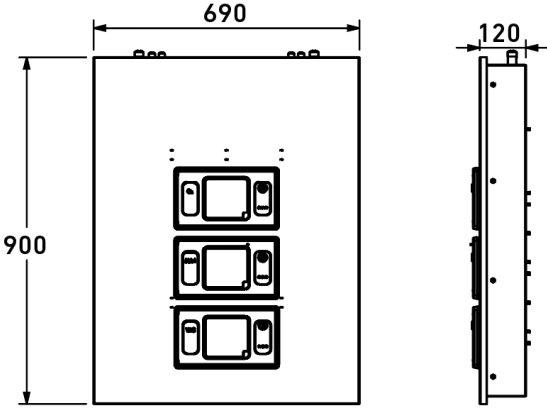

The AVSU Module Unit is manufactured in accordance with HTM 02-01, HTM 2022, EN ISO 7396-1, and NIST EN ISO 18082 standards.
