

SERUM ASKISI

MODEL: 10310
SiPARİŞ NO: 55.1001

Description

A serum hanger is a piece of hospital equipment made of stainless steel that is used in hospitals and healthcare facilities to administer serum, medication, or fluid supplements to patients. Its primary purpose is to hold the serum bottle or bag at the appropriate level for the patient, allowing the fluid to flow safely and in a controlled manner through the vein by means of gravity.

General Features

Hanger Features	4 Stainless Steel Serum Hanger Hooks
Wheel Features	5 Wheels (Ø50mm), 2 with Brakes
Weight	42 kg (Set of 10)
Packaging Dimensions	670x670x1200mm
Height	
Adjustment Features	Mechanical

Material Features

Body Material	Ø32x1.2mm and Ø25x1.2mm (AISI 304, DIN X5 CrNi 18-10) Stainless Steel Pipe
Foot Material	Plastic Foot
